Skills

OS

Linux, Windows

LANGUAGES

Java, Python, Javascript, ANT, Groovy
Angular, GWT

FRAMEWORK

Sumologic, Web-development

DATABASES

SQL, MongoDB

OTHERS

Regression, Classification
Sckit-learn, Tensor-flow
Postman, Gitlab, Azure
CI-CD, Docker

Coursework

Machine Learning
Computer Vision
Audio Processing
Data Structures
Web Development
SQL

Education

2026-PRESENT

MS IN AI

University Of Maryland

2017-2021

B.TECH. IN ECE

MIT-WPU PUNE

CGPA : 8.11/10

2015-2017

INTERMEDIATE

St Arnold's hr sec school, Indore

Percentage: 75.4%

Brief Overview / Summary

I'm currently a **Graduate Student** in the **MS in Artificial Intelligence** program at the **University of Maryland**, College Park. Previously, I was a **Software Specialist** at the US-based product company **PTC**, where I was recognized with three awards in four years. Before that, I worked as a **Software Engineer** at the startup **MiniOrange**. I've completed Stanford's online Andrew Ng courses on **Supervised Machine Learning**, **Unsupervised Learning** and **Deep Learning**. Additionally, I hold an NPTEL certificate in **Advanced Graph Theory** and have briefly served as a training instructor at **Accio**.

Experience

PTC MAR, 2022 - CURRENT

Software Specialist

- Contributed to 2 teams at PTC: Migration [Azure Cloud] and Redline.
- Led the **architecture** and **implementation** of CCD code structure.
- Solely built **CI/CD** pipeline for SCCM using GitLab.
- Worked as Full-Stack developer on Windchill Redline [GWT].
- Delivered major contributions in merging and syncing for 12+ Redline features.

MINIORANGE NOV, 2021 - FEB, 2022

Software Engineer

- Learned about various login security protocols.
- Worked on various integration and advancement in **Drupal SAML IDP** and **Drupal OAuth Client** as well as Incorporate **Mapping** Options.
- Worked on **Rest API Authentication** methods and had customer interaction with them.

ANALYTICS DOMAIN MAY, 2020 - SEPT, 2020

Internship

- Built a Django-based web app to rate essays using **NLP**, simulating IELTS band scoring, incorporating various lexical and Grammatical rules.
- Conducted **research** on integrating **Machine Learning** solutions for team projects and embrace learning on my own.

Side Project

Nifty 50 Stock Predictor

Python, XGBoost, ML, Pandas

Built a machine learning model to identify stocks likely to gain 7%+ within a two-week horizon

Bot-Trader

fastAPI, next.js, PostgreSQL, Pandas

Personal automated trading Platform connected with Fyers API, to manage trade with no human intervention 24/7

Visual Sorting Algo

JavaScript, SortAlgo, HTML, CSS

Created an interactive Website to Visualize Sorting Algorithms

Drowsy Detection

Python, Computer Vision

With the face land-Mark checking the ratio of distance between horizontal and vertical eyelid marks to determine Drowsiness.

Sudoku Solver

Python, Algorithms, Creative Problem Solving

Created a project With two algorithms to solve Sudoku.
